Small-Batch-Treater
Type: W.N. 5/00

Description

- High-quality treatment of all seed types for seed breeding
- Perfect degree of treatment thanks to sophisticated paddle treatment technology
- Particularly suitable for seed breeding and application trials
- Perfect treatment result from 5 grains to 40 gram
- Optimum grain-to-grain distribution
- Homogeneous grain coating
- Seed protection thanks to flexible paddles
- Outlet channel removable via quick-release fastener for quick and easy cleaning
- Electrically controlled discharge flap
- Made entirely from stainless steel
- Slurry dosing via peristaltic pump
- Blow-out nozzle in the treatment chamber reliably prevents seed mixing
- Transportable and can be used anywhere (230 V and compressed air connection required)
- Tool-free access to the treatment chamber enables quick inspection and cleaning

Functions

- Mixing cylinder with special paddles for homogeneous treatment
- Very simple control of the pump run time, post-mixing time, discharge time and number of blow-outs conveniently via swivel-mounted touch display
- Slurry addition via laboratory peristaltic pump
- Aspiration connection on the rear of the machine
